Our Approach

Discovery & Strategy

We analyze your industry and identify opportunities to streamline your processes with a tailored strategy.

Design & Development

Our team creates user-friendly digital solutions designed for efficiency and scalability.

Marketing & Promotion

We implement targeted marketing strategies to increase visibility and engagement, with a focus on maximizing impact.

Monitoring & Optimization

We continuously monitor performance, using data insights to refine and enhance results over time.

Case Studies

Challenge

Our client, a large scale grocery chain, approached us with several pressing challenges:

Overloaded with Manual Tasks

Audits, paperwork, follow-ups were eating into the finance departments time.

Inconsistent Client Communication:

Franchise owners used different communication methods, leading to constant audits that caused a backlog and mismanagement of budget.

Lack of Data Insights:

Without a centralized system, corporate couldn't track performance or identify trends to optimize their budget allocation strategy.

Solution

Implemented a unified Communication System and RFP proposal system: Streamlined the franchise unit RFP process and saved the company 4000 hrs of manpower per year by building a custom software solution that removed the backlog and eliminated inefficiencies

Outcome

In two years:

- Completely eliminated backlog,
- 7% uptick in revenue (equates to 450k in savings)
- 4000 hrs of manpower saved in which those resources were allocated to other more pressing projects.

Pricing Options

Basic Automation Package

Perfect for small operations:

Starting at:

\$30

- ✓ Entry-level automation setup for routine tasks (e.g., email follow-ups, data entry, Lead Gen etc).
- ✓ Integration with existing CRM and communication tools.
